

Project Navigator, Ltd. (PNL) Delivers Small-Scale, Distributed PV Solar Developments to Three Client Groups

PV NAVIGATOR

PNL's PV solar power capabilities and services include:

- Project feasibility evaluations
- Siting, studies, especially on landfills and brownfield sites
- Project economic forecasts
- Contracting and procurement
- Permitting
- Engineering and Construction Management
- PPAs
- Financing
- Project development

Utilities

PNL's focus is on the development and delivery of small scale (<10MW) infill power plants to meet RPS requirements.

Industrial & Commercial Clients

PNL delivers solar power consulting and development services to allow industrial clients to gain control of their power costs, or leverage the use of environmentally impacted land (e.g. landfills) to site a solar power facility.

Municipalities & Cities

PNL provides solar services from basic feasibility studies and PPA contract management, to the development of small scale, local plants which could power, for example, City Hall, the police department, or a waste water treatment facility.
